iRule to Provide Global Caché Products as Part of iPhone/iPod/iPad Universal Remote Control Solution

Jacksonville, OR, USA – May 12, 2010 - Global Caché, a leading provider of WiFi and wired connectivity products, and iRule LLC, provider of the popular iRule application that turns the Apple iPhone/iPod touch and the new iPad into a universal remote control, announced a partnership today, authorizing iRule as a Global Caché Value Added Reseller (VAR). Combining the iRule app with the Global Caché iTach and GC-100 Network Adapters provides seamless access and control to standard AV equipment from an iPhone, iPod, or iPad. The iRule app is currently available on the Apple iTunes store.

Global Caché's award-winning iTach physically connects any IR, serial, and relay device to a WiFi or wired TCP/IP network so that the devices can be monitored, accessed, and controlled. The iTach includes onboard IR learning, IR emitters, an IR blaster, Power over Ethernet (PoE) options, and supports multiple simultaneous users. The award-winning GC-100 Network Adapters connect IR, serial, and relay devices to a TCP/IP network. Global Caché products support sensor input and are engineered to integrate easily in any control and automation environment.

iRule LLC is the maker of the iRule application which transforms an iPhone/iPod/iPad into a universal remote to control AV equipment easily, with no technical expertise required. iRule includes a unique online database containing IR codes for thousands of devices and interface templates. The cloud-based solution allows for the community of iRule users to share codes and templates.

Itai Bengal, iRule President, said, "This partnership is really key for us, especially since the use and popularity of the iPhone and iPad as control devices is taking off. We are seeing so much interest and activity around this capability; it is amazing. The ability to sell the iTach and GC-100s to our iRule customers makes things very simple for purchasing, setup, and use. "

Robin Ford, Global Caché VP agreed, saying, "It is great to be partnering with iRule. We are thrilled to see the incredible market response to control apps on the iPhone and iPad. It is a cool way to control your AV equipment, and we're happy that our products are playing such an important role in the connectivity part of the solution."

About Global Caché, Inc.

Global Caché is dedicated to producing state-of-the-art products that enable technology in homes and businesses. Our award-winning iTach and GC-100 Network Adapters provides the means for network-based automation and management software to access, control, and deliver services in a networked environment to diverse and previously unconnected devices and appliances. In addition, Global Caché provides IR learners, sensors, receivers, and conversion cabling to connect previously unconnected systems to a network. Global Caché sells through

distributors, VARs, and OEMs. For more information on Global Caché and our products and services or to place an order, visit online at www.globalcache.com or call us at 541.899.4800.
